## PLAY: Budget Frenzy! Worksheet

You're 22 years old, working full-time, and living in an apartment with a roommate. You made a budget including both fixed expenses, like rent, and variable expenses, like gas and groceries.

1. Follow your coach's directions to find your income for your monthly budget for variable expenses. Write that number below.
2. Your coach will reveal different variable costs that come up throughout the month. You decide whether you want to pay that expense or not. Be quick! If you do decide to pay for something, check the "Bought?" box and write down the amount under "Amount Paid". Subtract the amount from your monthly budget to calculate your new total.
